

# Synergies of ERA & EEA

Interaction of research and education in  
Universities' cross-border cooperation – case  
Arctic Five

**Tuesday 28th of September at 10-11.15 CEST**

**ONLINE**

**REGISTRATION**

Combining European Research Area (ERA) and European Education Area (EEA) plays a central role in the future landscape of European research and education policies. The synergies between higher education and research build strongly on the dual role of universities.

On this online event we will discuss about the ongoing policy process on the synergies of ERA and EEA and what we can learn from the long-standing university cooperation where the interaction of research and education drives the collaboration.

## PROGRAMME:
